

PHYS 1004, Summer 2021

Information and Course Outline

1. Course Description

This course is designed to introduce electricity, magnetism, circuits, electromagnetic induction, and electromagnetic waves from a physics perspective for students in engineering programs. The associated laboratory sessions will meet virtually on a weekly basis starting in the first week of the term. Student evaluations will be based on labs, online and a final exam.

This calculus-based online course introduces electricity, magnetism, oscillations, waves, and optics. The laboratory is an essential and autonomous part of the course.

A credit in this course precludes additional credit for PHYS 1002, PHYS 1008 and BIT1204.

Some students believe that if they can follow the lectures, then they have learned physics. This is usually not true. Learning physics is not a spectator sport. To learn physics, a student must do work outside of lecture time thinking about, and interacting with, the course material. *No one ever learns physics by simply reading about it or listening to someone talk about it. You learn it by making the effort to understand the material and by solving problems using the principles learned.* The standard requirement in a college course is that you spend two hours outside of class for every hour of lecture. There is no substitute for spending time learning the material.

It must be said, learning physics is a very active process! Everyone one can do it with some effort. You all can do it. You will need to take the lead in this effort. Ask questions whenever you need help! Watching someone else "do physics" does not often do much for you! Once you realize that PHYSICS is really fun as you see it in every day's life then you will know that you have understood it.

Please note that summer course is a very condensed (shorter time than Fall and Winter courses) and hence students must keep up with learning every day and not let go until after the final exam.

2. Course Times

Lectures

Room Online at real time via BBB on Brightspace

Time: Monday and Wednesday, 2:35 to 5.25 pm

Instructor:

Dr. Mustafa Bahran

Office: 3412 HP

Phone: 613-520-2600 EXT. 5094

E-mail: mustafabahran@cunet.carleton.ca

Hours: Online Friday 6:05 to 8:05 pm

Laboratory

Room: Online at real time

Time(s):

A2: Tuesday, 8:35 to 11:25 am

A3: Thursday, 2:35 to 5:25 pm

Supervisor:

Maria Paula Roza Martinez

Office: HP 3304

E-mail: prmartin@physics.carleton.ca

Final Exam: Date, time and location to be confirmed.

For online support page regarding Bright space please go to:

<https://carleton.ca/brightspace/instructors/>

3. Course Objectives

We will become familiar with electromagnetic theories, concepts and applications surrounding:

1. Electric Phenomena
 - a. Notion and applications of charges
 - b. Coulomb force as a function of charge and distance
 - c. Electric fields as a function of charge and their influence as the origin of the Coulomb interaction
 - d. Parallel plate system as a source for a uniform E field
 - e. Electric potential energy and electric potential
 - f. Potential Difference and its connection to Electric fields and Work
 - g. Capacitors as devices to store charge and energy.
2. DC and AC Circuits
 - a. Currents in a conductor under the influence of a potential difference
 - b. EMF and batteries
 - c. Resistors
 - i. Circuits with multiple resistors – equivalent resistance
 - ii. Circuits with multiple EMF's – Kirchhoff's Laws
 - d. Circuits with resistors and capacitors in combinations – RC Circuits
 - e. Sinusoidally varying EMF
 - i. Reactance and impedance within an AC circuit
 - ii. Effect on Power and current
 - iii. Resonance and bandwidth
3. Magnetism
 - a. Effect of B field on a moving charge
 - i. Right Hand Rule
 - ii. Mass Spectrometer
 - iii. Velocity Selector
 - b. Effect of B field on current in a wire
 - c. Moving charge as the source of B fields
 - d. B fields around wires
 - e. Solenoids
 - f. Electromagnetic Induction
4. Electromagnetic Radiation
 - a. EM Spectrum and characteristics of EM waves
 - b. Wave phenomena
 - i. Refraction
 - ii. Reflection
 - iii. Polarization

Numerical solutions and critical thinking will be utilized and tested through assignments and laboratories. Direct real-world applications are highlighted in lectures, examples and reading from the textbook.

This course will rely heavily on a basic understanding of both differential and integral calculus for the theoretical development of concepts presented. Some topics of advanced calculus may be introduced, though will not be developed in any meaningful way, such as partial derivatives, line integrals and surface integrals.

Additionally, significant practice in problem solving, algebra and scientific computing will be exercised throughout the term. Formula sheets will be provided but knowledge of the meaning

and the concepts they reflect will be part of the objectives of the lectures and therefore are the student's responsibility to use in assignment and tests accordingly.

More detail on the relevant chapters from the textbook and the course of these topics within the tentative lecture schedule is given in **Section 6**.

4. How the Course is Run

4.1. Pre-requisites

Students in this course must normally have **MATH1004** and either have passed or be concurrently registered in **ECOR 1045** and **ECOR 1046** or **ECOR 1053**.

- or else have passed PHYS 1003 Introductory Mechanics and Thermodynamics
 - or PHYS 1001 Foundations of Physics I
 - or PHYS 1007 Elementary University Physics I (with a grade of at least B-)
 - or BIT1203 Physics for Photonics I

If you do not have both requirements you must check with your professor to obtain permission of the Physics Department to take this course. If you withdraw from ECOR 1101 during the term, you will be required to also withdraw from PHYS 1004.

4.2. Required Text

Fundamentals of Physics, Halliday, Resnick and Walker 9th, 10th or 11th E, Volume 2, Chap 21-44. J. Wiley & Sons. (Available at the Bookstore, University Centre. Also the publisher has an online version of the book that you can get from their site: <https://education.wiley.com/ngonboard/index.html#/LoginSSO>)

4.3. Web Page

This course will make extensive use of Brightspace to deliver Online Assignments, Course Material, Information, Tracking Grades, Suggested Problem Sets, etc. The address to start off with is <https://brightspace.carleton.ca/>

Once you have logged in, your browser will load a page that has course links to any of the courses that you are enrolled in. Click on:

PHYS1004A Electromagnetism & Wave Motion (LEC) Summer 2021

If you are unable to access Brightspace or need help with your computing account, please contact the CCS Service Desk at 520-3700 or email ccs_service_desk@carleton.ca.

4.4. Labs

Labs start the week of **July 5, 2020**.

Due to COVID-19 quarantine circumstances, the labs this term will be delivered virtually through the BigBlueButton web conferencing system on Brightspace. The virtual laboratories will concentrate on data analysis techniques, stressing the statistics, uncertainties, error propagation, and results comparison on previously collected data. Although the measurement and hands-on aspect of the labs will be mostly missing, when possible, suggestions on how to perform a simplified version of the experiment at home will be provided.

Students will be required to download and use the **Logger Pro software** from Vernier (download and installation details will be provided through Brightspace). If a student experiences any problems or is unable to access and use Logger Pro, that student should contact and inform the Lab Coordinator to arrange for a different delivery of the material. It is strongly recommended to have Logger Pro installed before the Introductory session.

Attendance to **all** labs and submission of lab work (write-up and Logger Pro files) for each experiment are required as a passing condition for this course. Note that you can only attend the lab section that you are registered in. If you have a documented reason for missing a laboratory session, you must contact the Lab Coordinator **immediately**. A make-up session may be arranged in these cases. If you do not have valid justification, you will not be permitted to take a makeup session, and you will receive a mark of zero for that experiment.

For students repeating this course, you may request to be exempt from the lab (and have your lab mark carried forward from before) if you have completed all the lab experiments with an acceptable lab mark. You must contact your lab supervisor and obtain explicit permission to be exempt from the lab.

4.5. Lecture attendance

Although **most** lectures will be recorded and recordings will be made available at most next day to delivery, it is highly recommended that students attend every lecture (online) throughout the term, and it is therefore expected that students will make every effort to do so. Lectures will contain additional information, hints and examples that may not be available on the lecture slides, in the textbook or in general information provided via the course Brightspace website. If a student misses a lecture, it is his or her responsibility to determine what information was presented. That is to say: **students are responsible for everything the professor delivers during lectures as well as materials in relevant chapters of the book and on Brightspace. That is in addition to the lab requirements.**

It is also expected that students will also read relevant sections in the textbook (or the equivalent) that match those presented during lectures. Due to the time constraints, it is not always possible to give the most complete description of all phenomena in the lecture. Supplemental material is found in the textbook and is therefore subject to appear on tests and assignments.

4.6. Tests and Assignments

4.6.1. Brightspace Weekly Assignments (HWs)

There will be 6 online HW assignments that will be used as part of the overall term marks. These will be administered through Brightspace and can be accessed through the content section. The assignments will be based on material studied during the lectures during that week. Each HW assignments will be available for a full week for students to solve.

Be vigilant and be sure to always check the due dates on the list. There will be one assignment or 2 scheduled on a weekly basis; the actual date and times are to be determined at the beginning of the term.

If there is any discrepancy between the marks posted in Brightspace grade and your calculated values notify the instructor immediately.

Questions

Before starting each assignment, first read the relevant chapter(s) in the textbook. Each assignment will consist of calculation-based questions or a MC question. You will be given 2 attempts at each assignment before the posted deadline, **no additional** attempts will be allowed following the deadline, with the highest mark of the two attempts taken as the mark for that assignment. Questions have randomized choices of input variable values, so that no two attempts are likely to repeat the same question set.

Numerical Answers

In answering the assignment calculation questions enter the answer when appropriate in **scientific notation with three significant figures e.g. 1.60E-19 for 1.6×10^{-19}** . You are allowed a 5% variance between your answer and the one calculated within Brightspace to account for round errors, and so on. If you do not your answer with three significant figures your answer will be outside of this 5% threshold and will therefore be marked as incorrect. Answers of this sort will not be eligible for re-assessment by the professor.

Be sure always to take careful note of the units for your answer, typically it is expected that the answer will follow SI units (m, s, J, etc.) however there are occasions in with non-standard units will be required for the specific question. Generally, these instances will be noted in the question itself, e.g. "Express your answer in km". Also, units are **not to be entered** with the numerical answer for these assignments!

Scientific Calculators

It is highly recommended that you use and understand the functionality of a reliable scientific calculator for all calculations on assignments and tests. In particular, it is good practice to fully understand how to use the scientific notation functionality that all scientific calculators will have available. This will save a great deal of time in all your calculations and greatly reduce mistakes. There are a number of additional functions (such as tabbed results) which can be beneficial in performing calculations.

4.6.2. Pre-Class Quizzes (RQs)

In addition to the weekly online assignments through Brightspace, there will be a pre-class quiz due before each lecture. The quiz will consist of several multiple-choice questions with a 45-minute time limit

There will only be one attempt at these quizzes and all quizzes will count toward the final PCQ grade. The questions will be conceptually based and so in general no calculations will be needed to complete any individual question. The PCQ will generally open 2-3 days prior to the deadline, so be diligent when checking Brightspace.

4.6.3. Final Examination

Final examination will be an online exam. It will be scheduled during the regular examination period, at the end of the term. The final exam will be a cumulative covering all sections and chapters studied during the lectures.

The exam will not include material from the laboratory manual.

The exam will be e-proctored via Carleton e-proctoring service. Students must adhere to the rules and requirements of the e-proctoring process as spelled out by Carleton and the course instructor prior to the exam date.

4.7. The Marking Scheme

The marking scheme will be as follows:

Online Assignments:	25%
Pre-Class Quizzes	15%
<u>Final Exam:</u>	<u>25%</u>
Theory section	65%
<u>Laboratory:</u>	<u>35%</u>
Total	100%

4.8. Passing Conditions

In order to pass the course, students must attempt and hand in a report for **all labs**. Missing labs must be accounted for, usually by bringing in a doctor's note, to the Lab Supervisor. There will be an assigned date at the end of the term for students to make-up labs missed due to a valid reason. In addition, you must have

1. an overall mark must be **greater than 50%**, AND
2. must achieve **40% or above** on *BOTH* the Theory ($\geq 26/65$) *AND* the Lab ($\geq 14/35$) components of the course.

(**NOTE:** Theory includes Assignments, PCQ and Final Exam)

Students with an overall course mark above 50%, but who achieve between 40% and 49% on either Theory or Lab Experiments will be given a grade of D-, no matter how good their overall mark is.

5. Additional Information

5.1. Carleton Academic year:

<https://calendar.carleton.ca/academicyear/>

5.2. Academic Accommodations

5.2.1. Students with Disabilities

The Paul Menton Centre for Students with Disabilities (PMC) provides services to students with Learning Disabilities (LD), psychiatric/mental health disabilities, Attention Deficit Hyperactivity Disorder (ADHD), Autism Spectrum Disorders (ASD), chronic medical conditions, and impairments in mobility, hearing, and vision. If you have a disability requiring academic accommodations in this course, please contact PMC at 613-520-6608 or pmc@carleton.ca for a formal evaluation. If you are already registered with the PMC, contact your PMC coordinator to send your Letter of Accommodation at the beginning of the term, and no later than two weeks before the first scheduled test or exam requiring accommodation (if applicable).

*The deadlines for contacting the Paul Menton Centre regarding accommodation for final exams for the early summer exam period is June 1st, 2018 and for the late summer exam period is July 23rd, 2018.

5.2.2. For Religious Obligations:

Students requesting academic accommodation based on religious obligation should make a formal, written request to their instructors for alternate dates and/or means of satisfying academic requirements. Such requests should be made during the first two weeks of class, or as soon as possible after the need for accommodation is known to exist, but no later than two weeks before the compulsory event.

Accommodation is to be worked out directly and on an individual basis between the student and the instructor(s) involved. Instructors will make accommodations in a way that avoids academic disadvantage to the student.

Students or instructors who have questions or want to confirm accommodation eligibility of a religious event or practice may refer to the Equity Services website for a list of holy days and Carleton's Academic Accommodation policies or may contact an Equity Services Advisor in the Equity Services Department for assistance.

5.2.3. For Pregnancy:

Pregnant students requiring academic accommodations are encouraged to contact an Equity Advisor in Equity Services to complete a letter of accommodation. The student must then make an appointment to discuss her needs with the instructor at least two weeks prior to the first academic event in which it is anticipated the accommodation will be required.

5.2. Copying, plagiarism, and other forms of cheating

University rules regarding registration, withdrawal, appealing marks, and most anything else you might need to know can be found on the university's website, here:

<http://calendar.carleton.ca/undergrad/regulations/academicregulationsoftheuniversity/>

In this course, these rules are relevant mainly for lab reports (do not copy someone else's), tutorial tests and the final exam (do not attempt to use unauthorized materials or collaborate with other students). A report will automatically be sent to the Dean of your Faculty, for possible further disciplinary action.

5.2.1. Plagiarism

Plagiarism is the passing off someone else's work as your own and is a serious academic

offence. For the details of what constitutes plagiarism, the potential penalties and the procedures refer to the section on Instructional Offences in the Undergraduate Calendar.

5.2.2. What are the Penalties for Plagiarism?

A student found to have plagiarized an assignment may be subject to one of several penalties including: expulsion; suspension from all studies at Carleton; suspension from full-time studies; and/or a reprimand; a refusal of permission to continue or to register in a specific degree program; academic probation; award of an FNS, Fail, or an ABS.

5.2.3. What are the Procedures?

All allegations of plagiarism are reported to the faculty of Dean of FASS and Management. Documentation is prepared by instructors and/or departmental chairs.

The Dean writes to the student and the University Ombudsperson about the alleged plagiarism.

The Dean reviews the allegation. If it is not resolved at this level, then it is referred to a tribunal appointed by the Senate.

5.2.4. Survivors of Sexual Violence:

As a community, Carleton University is committed to maintaining a positive learning, working and living environment where sexual violence will not be tolerated, and where survivors are supported through academic accommodations as per Carleton's Sexual Violence Policy. For more information about the services available at the university and to obtain information about sexual violence and/or support, visit: <https://carleton.ca/equity/sexual-assault-support-services>

5.2.5. Accommodation for Student Activities:

Accommodation for Student Activities: Carleton University recognizes the substantial benefits, both to the individual student and for the university, that result from a student participating in activities beyond the classroom experience. Reasonable accommodation must be provided to students who compete or perform at the national or international level. Write to me with any requests for academic accommodation during the first two weeks of class, or as soon as possible after the need for accommodation is known to exist. <https://carleton.ca/senate/wp-content/uploads/Accommodation-forStudent-Activities-1.pdf>

5.3. Deferred Exams

Deferred Exams are generally only granted to students who cannot take the regularly scheduled exam due to illness or condition beyond their control. Students must present a doctor's note to the Science Registrar within five working days of the date of the final exam. The Deferred Exam replaces only the Final Exam portion of the marks.

In order to be eligible for a Deferred Exam you must have earned at least 8 out of the possible 25 marks on term work in the theory component of the course (i.e. the Assignments, ICQ and PCQ) and at least 14 out of the possible 35 lab marks.

5.4. Request for Documentation in Accessible Format

This document is available in a variety of accessible formats upon request. A request can be made on the Carleton University website at:

<http://www.carleton.ca/accessibility/request>

The course outline will be posted on the Brightspace website. We reserve the right to amend the course outline on the Brightspace website and will inform you if that version changes. In the event of any discrepancy between this document, and the version currently posted on the website, then the website version will be taken as the definitive version.

5.5. Email

Every student must use their Carleton Connect account in any communication to University academic staff. Emails sent from external e-mail accounts will **not** be answered. Please do not forward your emails from Carleton connect accounts to external emails. The University will not be responsible if important communications from the University, including the course instructors and academic staff, are not delivered due to a failure in the forwarding process. *It is important to monitor the space available in your account. If a message cannot be delivered due to an overflow, then you may miss something important.*

When communicating with the lecturer or lab supervisor, please write your email in a structured, professional and coherent manner, with correct spellings and grammar, it should be treated as an official communication. It is also advisable that you include the course number (i.e. PHYS 1004) in the subject of your message to help ensure your message is not tagged as spam or junk by the email filter.

Additionally, it is possible to send emails through the Brightspace page, in which case the email will automatically be tagged as PHYS1004.

I have the habit of answering emails within the same day mostly with a couple of hours but in rare occasion I would answer the next day.

***Netiquette:** If you take part in forum discussions or read the comment sections of news stories online, you will have no doubt noticed that online culture often encourages highly uncivil discourse. In this class, however, we will collectively strive to create a harmonious and productive learning environment, and that means being very attentive to our language and tone. You can find an excellent set of suggestions for online netiquette on this website: familiarize yourself with the recommendations that this document lays out, as they articulate my own expectations. Note that we are all subject to the Human Rights Code, and that I absolutely will refer any flagrantly threatening or abusive behavior online to the Equity and Inclusive Communities office for investigation and follow-up. For any synchronous components of our course (Q&A sessions, office hours, the peer reviews), it is vital that you have a mic and, preferably, a webcam, and that you enable both when you are engaging in conversation with other people. When we communicate, things such as tone, facial expressions, and body language tell our listeners a lot of about how we want them to understand our message. I know it can be tempting to turn off your webcam in particular, but I ask you to use it when you're communicating synchronously with me or any other students in the class.*

6. Lecture Schedule and Syllabus

Note this is a tentative schedule of Chapters covered by lecture (this schedule of lectures is subject to moderate changes as the semester progresses)

RQs are available at least 3 days before due time and HWs are available one week before due time. Make sure to check the exact due time of the due date. It is stated when you click on the icon of the RQ or HW.

Lecture	Topic(s)
Jul 05	Introduction Math and Physics Review Ch 21 – Coulomb’s Law RQ1 is due.
Jul 07	Ch 22 – Electric Fields RQ2 is due.
Jul 12	Ch 23 – Gauss’ Law HW1 is due.
Jul 14	Ch 24 – Electric Potential RQ3 is due. HW2 is due.
Jul 19	Ch 25 – Capacitance Ch 26 – Current and Resistance
Jul 21	Ch 27 – Circuits RQ4 is due. HW3 is due.
Jul 26	Ch 28 – Magnetic Fields Ch 29 – Magnetic Fields due to Currents
Jul 28	Ch 30 – Induction RQ5 is due. HW4 is due.
Aug 02	Civic Holiday
Aug 04	Ch 31 – Electromagnetic Oscillations and Alternating Current
Aug 09	Ch 32 – Maxwell’s Equations RQ6 is due. HW5 is due.
Aug 11	Ch 33 – Electromagnetic Waves
Aug 16	Catch-up and course review

7. Lab Schedule

Lab #	Title	Weight (%)	Week of
0	Introductory Session		July 5, 2020
1	Electrostatics	20	July 12, 2020
2	DC Circuit	20	July 19, 2020
3	Oscilloscope	20	July 26, 2020
4	Magnetic Balance	20	Aug 2, 2020
5	RLC Circuits	20	Aug 9, 2020

***Relevant documentation for each experiment will be posted on Brightspace one week prior to the scheduled lab session. A prelab quiz will be administered on Brightspace for every experiment.

8. Important Information:

- Student or professor materials created for this course (including presentations and posted notes, labs, case studies, assignments, and exams) remain the intellectual property of the author(s). They are intended for personal use and may not be reproduced or redistributed without prior written consent of the author(s).
- Students must always retain a hard copy of all work that is submitted.
- Standing in a course is determined by the course instructor subject to the approval of the Faculty Dean. This means that grades submitted by the instructor may be subject to revision. No grades are final until they have been approved by the Dean.
- Carleton University is committed to protecting the privacy of those who study or work here (currently and formerly). To that end, Carleton's Privacy Office seeks to encourage the implementation of the privacy provisions of Ontario's Freedom of Information and Protection of Privacy Act (FIPPA) within the university.
- In accordance with FIPPA, please ensure all communication with staff/faculty is via your Carleton email account. To get your Carleton Email you will need to activate your MyCarletonOne account through Carleton Central. Once you have activated your MyCarletonOne account, log into the MyCarleton Portal.
