

## Elementary University Physics I

PHYS 1007 A / PHYS 1007 B / BIT 1203 A

*Fall term 2022*

### Course description and prerequisites

This course is the first part of the general physics course with emphasis on mastering the basic concepts required by scientists in other disciplines. We will cover the fundamental laws of motion, dynamics, energy and momentum conservation, fluid dynamics and heat transfer. Applications in a variety of disciplines and real-world examples will be used frequently.

This course is intended for students who lack the prerequisites for PHYS 1001 or PHYS 1003, or who do not intend to take upper-year courses in physics. Precludes additional credit for BIT 1002, BIT 1203, PHYS 1001, PHYS 1003. Prerequisite(s): (i) Grade 12 Mathematics: Advanced Functions or equivalent, or MATH 0107 (may be taken concurrently); or (ii) Grade 12 Mathematics: Calculus and Vectors or equivalent, or MATH 1007 (may be taken concurrently); or (iii) permission of the Physics Department.

***Lectures three hours a week; laboratory, or tutorial an additional three hours per week.***

### Instructors

Mustafa Bahran	PHYS1007A+ BIT1203A online lectures	MustafaBahran@cunet.carleton.ca
Razvan Gornea	PHYS 1007B in-person lectures	RazvanGornea@cunet.carleton.ca
Tamara Rozina	Lab/tutorial sections coordination	Tamara.Rozina@carleton.ca
Julie Sutton	Lab instructor	juliesutton3@cunet.carleton.ca
Jesse Lock	Lab instructor	jesselock@cunet.carleton.ca

Office hours are posted on the respective Brightspace websites. All email communications must be done from your Carleton University account. Email early about any possible issue regarding this course work and grades, and please keep copies of all exchanges until the end of the term.

### Textbook

**Physics, Fifth Edition, Alan Giambattista**, McGraw Ryerson Ltd., ISBN: 9781260570052

Can be bought at <https://www.bkstr.com/carletonstore>

## Course philosophy and objectives

Broadly speaking, physics provides the ideal opportunity to learn the art of quantitative thinking which is to learn how to turn a concept into something that one can calculate and measure. In order to solve a problem, you must critically examine the information available in a given situation; determine an effective method to approach the problem, and carry through to the solution, including a critical examination of the final answer to see if it is reasonable. These skills will serve you throughout your future careers, indeed through your life. This course is a good step towards that end. The goal of physics is to understand the physical universe and be able to accurately describe and predict what is observed. Physics is based on critical thinking, and hence helps to develop independence and free thinking. An understanding of physics may help you perceive the world around you in a more comprehensible, enjoyable, and fascinating way.

Some students believe that if they can follow the lectures in class, then they have learned physics. This is usually not true. Learning physics is not a spectator sport. To learn physics, a student must do work outside of class thinking about, and interacting with, the course material. ***No one ever learns physics by simply reading about it or listening to someone talk about it. You learn it by making the effort to understand the material and by solving problems using the principles learned.*** The standard requirement in a college class is that you spend two hours outside of class for every hour in class. There is no substitute for spending time understanding and learning the course material.

## Course websites

This course outline and additional information will be published on various Brightspace websites. There are two lecture groups, each with a different instructor who maintains its dedicated Brightspace website. For PHYS1007 A and BIT1203 A section, lectures will be given remotely using the BBB or Zoom conferencing system that can be accessed through the Brightspace lecture website. For PHYS1007 B section, lectures will be given in-person according to the class schedule. Lectures in both cases will be recorded but attendance in person or in real time for live lectures is preferred and encouraged since it allows the students to exchange with the instructor. Although the majority of lectures for the online section will be delivered live (synchronously) at the scheduled course time as well as recorded and posted after delivery, some of them will be only recorded and posted but not delivered live. When that happens students will be informed ahead of time.

In addition, there is a dedicated Brightspace website for the labs and tutorials. Please note that for this part of the course, students have been split in laboratory (same as tutorial) sections. Please, **carefully identify to which group you have been assigned** and follow the guidelines included below in the lab and tutorial sections.

## Lectures schedule

Mustafa Bahran	Group PHYS 1007 A and BIT 1203 A online lectures	Mondays & Wednesdays @ 8h35 - 9h55
Razvan Gornea	Group PHYS 1007 B in-person lectures ( <b>RB 2200</b> )	Wednesdays & Fridays @ 11h35 - 12h55

## Brightspace Weekly Homework Assignments (HWs)

There will be 1 or 2 weekly online HW assignments that will be used as part of the overall term marks. These will be administered through the respective Brightspace website. The assignments will be based on material studied during the lectures. The assignments will become available at the beginning of the week for the students to attempt. You will have 2 attempts during the week before the assignment closes (see calendar appended to this document).

If there is any discrepancy between the marks posted in Brightspace and your calculated values notify the instructor immediately.

### *Numerical Answers*

In answering the assignment calculation questions enter the answer when appropriate in scientific notation with three significant figures, e.g.  $1.60 \times 10^{-19}$ . You are allowed a 5% variance between your answer and the one calculated within Brightspace to account for rounding errors, and so on. If you do not provide your answer with three significant figures then your answer will be outside of this 5% threshold and will therefore be marked as incorrect. Errors of this sort will not be eligible for reassessment by the professor.

Ensure to always take careful note of the units for your answer, typically it is expected that the answer will follow SI units (e.g. m, s, J) however there are occasions in which non-standard units will be required for specific questions. Generally, these instances will be noted in the question itself, e.g. "Express your answer in km". Also, units are not to be entered with the numerical answer for the assignments.

## Pre-Class Reading Quizzes (RQs)

In addition to the weekly online assignments through the Brightspace website, there will be a reading quiz due before the lecture, as indicated in the calendar below. For details, please see the calendar for all the RQs along with lectures and HWs. These quizzes aim to ensure that you have read the designated chapter(s) from the textbook prior to attending class. There will only be one attempt at these quizzes and all quizzes will count toward the final grade (with the allocated time about 45 to 60 minutes). The questions will be, in general, conceptually oriented but sometimes calculations will be needed to complete an individual question.

## Tutorials

There will be a tutorial on each alternating week with the labs (for details, please see lab and tutorial schedule below).

### ***The structure of the tutorial is as follows:***

A set of tutorial problems will be posted on the lab/tutorial Brightspace website at least a week before the tutorial session. Students should attempt to solve all these problems in order to prepare for the tutorial. At the start of the tutorial session students will individually complete a multiple-choice quiz consisting of 4 questions. This is open book and lasts for 15 minutes. Then the TAs will demonstrate solving example problems and answering questions about the tutorial problem set. During the last hour of the tutorial will be a closed-book test consisting of two long-answer problems. ***Closed book means that you can use the formula sheet and a scientific calculator. No other aids are permitted.***

The grade for the tutorial test and the multiple-choice quiz will be combined to provide the final Tutorial Test grade for each of the 5 tutorial sessions this semester. The four highest test grades will be used to determine the final Tutorial Test score.

***Note that if you are late for the tutorial, you will miss the multiple-choice quiz, and forfeit these marks. There are no retakes possible.***

Students must normally attend the tutorial only in the lab section to which they belong. To be able to attend a different section, students must obtain permission from the lab coordinator Tamara Rozina (tamara.rozina@carleton.ca). Such permission will usually be granted only for emergencies or medical reasons. Therefore, if you cannot attend your own lab section one week due to e.g. medical reasons, let us know AS SOON AS POSSIBLE so that you can be rescheduled to a different section.

<b>Tutorial #</b>	<b>Title</b>	<b>Weight (%)</b>	<b>Week of</b>
1	<b><i>Vectors and kinematics</i></b>	25	September 19, 2022
2	<b><i>Newton's laws</i></b>	25	October 03, 2022
3	<b><i>Energy and momentum conservation</i></b>	25	October 31, 2022
4	<b><i>Torque and angular momentum</i></b>	25	November 14, 2022
5	<b><i>Oscillations and waves</i></b>	25	November 28, 2022

After your tutorial tests are returned, you are expected to keep them at least until the end of term. Please verify their marks entry on Brightspace and bring any clerical errors to our attention as soon as you can during the term.

## Final Examination

There is no mid-term examination in this course. Nevertheless, as seen below, grades are distributed along a variety of course components, stimulating the students to study and practice continuously, which is definitely the key to success in this course. There is a final examination which will be scheduled officially by the university for a date in December, to be announced toward the end of the term.

It is the responsibility of the student to be available during the final examination period. The final exam will be comprehensive and might include course material seen in the lab or tutorial sessions.

## Grade distribution

Reading quizzes (best 10 out of 14)	10%
Homework assignments (best 10 out of 14)	15%
Tutorials (best 4 out of 5)	15%
Labs	35%
Final examination	25%
<b>TOTAL</b>	<b>100%</b>

***Attending all labs and tutorials is mandatory.***

## Passing Conditions

In order to pass the course, students must meet the following conditions:

The overall mark must be **greater than 50%, AND**

Must achieve **40% or above** on **BOTH** the **Theory** ( $\geq 26/65$  marks) **AND**

the **Labs** ( $\geq 14/35$  marks) components of the course. Achieving more the 40% but less than 50% in either Lab or Theory while achieving 50% or more overall will translate into a grade of D-

**NOTE:** Theory includes Assignments, Reading Quizzes, Tutorial Tests, and the Final Exam

**The Final Exam must be attempted** to pass the course, even if you have managed to achieve 50% overall mark without the final exam.

## Lab sessions

Labs start the week of **September 12, 2022**.

All the experiments will be held in-person in the room **HP 4160**.

Information about the labs can be found on the LAB Brightspace page:

*Merge PHYS1007 L1:L2:L3:L4:L5:L6:L7:L8:L9 BIT1203 A1 University Physics I (LAB) Fall 2022.*

**It is imperative that all students attend the first lab.** You may attend only the section that you are registered in. All changes (exemptions, etc.) must be arranged with the Lab Coordinator, Ms. Tamara Rozina at the start of term. If you have a documented reason for missing a laboratory session, you must contact Ms. Rozina **immediately**. A make-up session may be arranged at the end of term in these cases. If you do not have documentation, you will not be permitted to take a makeup session, and you will receive a mark of zero for that experiment. Students who might be exempt from the Lab (if they are repeating the course, for example) must contact the Lab Coordinator. You are not automatically given a lab exemption – you must apply for it no later than **September 16, 2022**. Lab exemptions will be considered on a case-by-case basis at the discretion of the Lab Coordinator.

The grade for every lab will be based on a **report**. All reports count toward your total lab grade for the course. **No grade will be dropped.**

All reports must be submitted by the appointed time: **1 week** after the start of the lab session. The penalty for a late lab report is **20% up to the End Date** specified on Brightspace for every lab section report submission. It is the student's responsibility to check when the End Date is for each report. **No reports will be accepted for grading past their End Date.**

Lab #	Title	Deadline for report	Weight (%)	Week of
1	<i>Reaction Time</i>	1 week	10	September 12, 2022
2	<i>Density</i>	1 week	15	September 26, 2022
3	<i>Spring Constant</i>	1 week	25	October 17, 2022
4	<i>Atwood's Machine</i>	1 week	25	November 7, 2022
5	<i>Simple Pendulum</i>	1 week	25	November 21, 2022

## University policies

### ***Academic Regulations, Accommodations, Plagiarism***

University rules regarding registration, withdrawal, appealing marks, and most anything else you might need to know can be found on the university's website, here:

<http://calendar.carleton.ca/undergrad/regulations/academicregulationsoftheuniversity/>

### ***Academic Accommodations for Students with Disabilities***

The Paul Menton Centre for Students with Disabilities (PMC) provides services to students with Learning Disabilities (LD), psychiatric/mental health disabilities, Attention Deficit Hyperactivity Disorder (ADHD), Autism Spectrum Disorders (ASD), chronic medical conditions, and impairments in mobility, hearing, and vision. If you have a disability requiring academic accommodations in this course, please contact PMC at 613-520-6608 or [pmc@carleton.ca](mailto:pmc@carleton.ca) for a formal evaluation.

If you are already registered with the PMC, contact your PMC coordinator to send your *Letter of Accommodation* at the beginning of the term, and no later than two weeks before the first in-class scheduled test or exam requiring accommodation (*if applicable*).

<https://carleton.ca/pmc/>

### ***For Religious Obligations***

Students requesting academic accommodations on the basis of religious obligation should make a formal, written request to their instructors for alternate dates and/or means of satisfying academic requirements. Such requests should be made during the first two weeks of class, or as soon as possible after the need for accommodation is known to exist, but no later than two weeks before the compulsory event.

Accommodation is to be worked out directly and on an individual basis between the student and the instructor(s) involved. Instructors will make accommodations in a way that avoids academic disadvantage to the student.

Students or instructors who have questions or want to confirm accommodation eligibility of a religious event or practice may refer to the Equity Services website for a list of holy days and Carleton's Academic Accommodation policies, or may contact an Equity Services Advisor in the Equity Services Department for assistance.

### ***For Pregnancy***

Pregnant students requiring academic accommodations are encouraged to contact an Equity Advisor in Equity Services to complete a letter of accommodation. The student must then make an appointment to discuss her needs with the instructor at least two weeks prior to the first academic event in which it is anticipated the accommodation will be required.

***Survivors of sexual violence:*** *As a community, Carleton University is committed to maintaining a positive learning, working and living environment where sexual violence will not be tolerated, and where survivors are supported through academic accommodations as per Carleton's Sexual Violence Policy. For more information about the services available at the university and to*

*obtain information about sexual violence and/or support, visit [carleton.ca/sexual-violence-support](http://carleton.ca/sexual-violence-support).*

***Accommodations for student activities:*** Carleton University recognizes the substantial benefits, both to the individual student and for the university, that result from a student participating in activities beyond the classroom experience. Reasonable accommodation must be provided to students who compete or perform at the national or international level. Please contact your instructor with any requests for academic accommodation during the first two weeks of class, or as soon as possible after the need for accommodation is known to exist. For more details, see [the policy](#).

You can visit the Equity Services website to view the policies and to obtain more detailed information on academic accommodation at [carleton.ca/equity/](http://carleton.ca/equity/).

### **Plagiarism**

Plagiarism is the passing off of someone else's work as your own and is a serious academic offence. For the details of what constitutes plagiarism, the potential penalties and the procedures refer to the section on Instructional Offences in the Undergraduate Calendar.

### **What are the Penalties for Plagiarism?**

A student found to have plagiarized an assignment may be subject to one of several penalties including: expulsion; suspension from all studies at Carleton; suspension from full-time studies; and/or a reprimand; a refusal of permission to continue or to register in a specific degree program; academic probation; award of an FNS, Fail, or an ABS.

Students are expected to familiarize themselves with and follow the Carleton University Student Academic Integrity Policy (see <https://carleton.ca/registrar/academic-integrity/>). The Policy is strictly enforced and is binding on all students. Plagiarism and cheating – presenting another's ideas, arguments, words or images as your own, using unauthorized material, misrepresentation, fabricating or misrepresenting research data, unauthorized co-operation or collaboration or completing work for another student – weaken the quality of the graduate degree. Academic dishonesty in any form will not be tolerated. Students who infringe the Policy may be subject to one of several penalties including: expulsion; suspension from all studies at Carleton; suspension from full-time studies; a refusal of permission to continue or to register in a specific degree program; academic probation; or a grade of Failure in the course.

### **Assistance for Students**

Academic and Career Development Services: <http://carleton.ca/sacds/>

Writing Services: <http://www.carleton.ca/csas/writing-services/>

Peer Assisted Study Sessions (PASS): <https://carleton.ca/csas/group-support/pass/>

Math Tutorial Centre: <https://carleton.ca/math/math-tutorial-centre/>

Science Student Success Centre: <https://sssc.carleton.ca/>

### CALENDAR FOR PHYS 1007 B LECTURES AND ASSIGNMENTS

Week	Wednesday	Friday
1	September 7 <b>Lecture 1 on Chapter 1</b> <b>RQ1 Chapter 1 due</b>	September 9 <b>Lecture 2 on Chapter 2</b> <b>RQ2 Chapter 2 due</b>
2	September 14 <b>Lecture 3 on Chapter 2</b> <b>HW1 Chapter 1 due</b>	September 16 <b>Lecture 4 on Chapter 3</b> <b>RQ3 Chapter 3 due + HW2 Chapter 2 due</b>
3	September 21 <b>Lecture 5 on Chapter 3</b>	September 23 <b>Lecture 6 on Chapter 4</b> <b>RQ4 Chapter 4 due + HW3 Chapter 3 due</b>
4	September 28 <b>Lecture 7 on Chapter 4</b>	September 30 <b>Lecture 8 on Chapter 5</b> <b>RQ5 Chapter 5 due + HW4 Chapter 4 due</b>
5	October 5 <b>Lecture 9 on Chapter 5</b>	October 7 <b>Lecture 10 on Chapter 6</b> <b>RQ6 Chapter 6 due + HW5 Chapter 5 due</b>
6	October 12 <b>Lecture 11 on Chapter 6</b>	October 14 <b>Lecture 12 on Chapter 7</b> <b>RQ7 Chapter 7 due + HW6 Chapter 6 due</b>
7	October 19 <b>Lecture 13 on Chapter 7</b>	October 21 <b>Lecture 14 on Chapter 8</b> <b>RQ8 Chapter 8 due + HW7 Chapter 7 due</b>
8	<b>Fall break week</b>	<b>Fall break week</b>
9	November 2 <b>Lecture 15 on Chapter 8</b>	November 4 <b>Lecture 16 on Chapter 9</b> <b>RQ9 Chapter 9 due + HW8 Chapter 8 due</b>
10	November 9 <b>Lecture 17 on Chapter 9</b>	November 11 <b>Lecture 18 on Chapter 10</b> <b>RQ10 Chapter 10 due + HW9 Chapter 9 due</b>
11	November 16 <b>Lecture 19 on Chapter 10</b>	November 18 <b>Lecture 20 on Chapter 11</b> <b>RQ11 Chapter 11 due + HW10 Chapter 10 due</b>

12	November 23 <b>Lecture 21 on Chapter 11</b>	November 25 <b>Lecture 21 on Chapter 12</b> <b>RQ12 Chapter 12 due + HW11 Chapter 11 due</b>
13	November 30 <b>Lecture 22 on Chapter 12</b>	December 2 <b>Lecture 23 on Chapter 13</b> <b>RQ13 Chapter 13 due + HW12 Chapter 12 due</b>
14	December 7 <b>Lecture 24 on Chapter 14</b> <b>RQ14 Chapter 14 due</b>	December 9 <b>HW13 Chapter 13 due + HW14 Chapter 14 due</b>

Final Exam Details to be announced by the University in due time.

**Final Note:** This outline is subject to change by the professor any time, but if changes take place the students will be duly informed.

A [full list of important dates](#) is available on the Calendar website. The last date for Academic WD is November 15.

***Please note that the academic withdrawal dates have changed recently.***

Always consult the Calendar website for the most updated information:

<https://calendar.carleton.ca/academicyear>
